

“The Balfour team had six months to turn over this school to the owner..”

Richard Lee Elementary School

Location: Dallas, Texas
 Builder: Balfour Beatty Construction
 Architect: SHW
 BT PM: Matthew Clark
 BT Estimator: Preston Pressley
 Scope: Acoustical Systems (panels, ceilings, clouds) drywall, Exterior/Interior Framing and FRP.

Lee Elementary School is not your grandparent’s school, it’s not even like your parents school! This open-concept facility is modern and fun for teachers and students.

This project, like most projects today, had an accelerated schedule. The Balfour team had six months to turn over this school to the owner when BakerTriangle popped our first line. This facility proved to be challenging in many aspects, but our team lead by Max Ruiz accepted and owned this challenge. Lee Elementary featured ten amoeba shaped clouds, a “rock climbing” like wall around the elevator and very accessible floor plan just about everywhere you go inside and out.
