

Evelyn Meador Library

Location:	Seabrook, Texas
Builder:	Teal Construction
Architect:	English + Associates
BT Foreman:	Pat Allen
BT Project Manager:	Biff LeFevre
Scope:	Acoustical Ceilings, Metal Ceilings, Fabric Sail Cloth, Fabric Acoustical Ceiling Clouds and Aluminum Ceiling Trims.

Only a site visit or a high resolution photograph could give one full appreciation of this ceiling masterpiece. BakerTriangle mechanics used their experiences in acoustical and drywall ceiling installation to lay-out this challenging design.

Sixty- three fabric acoustical clouds were installed in this new Harris County library. Fabric sail cloth was used to create twenty-eight triangles spaced randomly in the ceiling. Armstrong MetalWorks products were used to form the metal ceilings. These mesh ceilings create a contemporary, open feel.

“Sixty-three fabric acoustical clouds were installed in this new Harris County Library.”
