

San Antonio Military Medical Center

Location:	San Antonio, Texas
Builder:	Clark/Hunt JV
Architect:	RTKL
BT PM:	Bryan Craft
BT Estimator:	Jon Randolph
Scope:	Metal framing, drywall, acoustical, GFRC, metal panel ceilings, wood ceilings and fire resistant joints.

“There’s not one thing that we can’t do for our patients here,” said Lt. Col. Lisa Lehning, chief emergency department nurse. This statement makes it very special for BakerTriangle to be such a huge part of constructing this amazing medical center. A project that was completed on a 24 month schedule and received LEED Silver certification.

At one point over 240 BT personnel were at work on SAMMC. As with any medical facility the work has to be precise and installed with the utmost quality. Counting on the experience and direction of the management team, BT used its vast knowledge in constructing medical facilities to take on this vast 760,000 square foot, 8 story monster. A final note that should be in bold letters: BT employees worked over 264,000 man-hours without a lost time incident!

“...BT employees worked over 264,000 man-hours without a lost time incident.”
