

“BakerTriangle had as many as 120 craftsmen on site on multiple weekends...”

UNT Business Leadership Building

Location: Denton, Texas
Builder: Hunt Construction Group
Architect: Polshek Partnership
BT PM: Steve Press
BT Estimator: Jim Hatch
Scope: Acoustical Ceilings, acoustical wall panels, Techstyle ceilings, wood panel grill ceilings, metal panel grill ceilings, metal ceiling panels, drywall and metal stud framing.

The mission of the UNT College of Business is to prepare tomorrow’s business leaders in an intellectually stimulating and collegial community through high-quality teaching, research, and service. Indeed, and looking at this building the students will have no excuse not to meet this goal.

BakerTriangle had as many as 120 craftsmen on site on multiple weekends to meet the aggressive schedule. BT installed the exterior metal stud framing and sheathing, interior metal stud framing and sheetrock, ceiling grid and tile, specialty ceilings, acoustical wall panels, doors and hardware. The classroom interior walls were lined with durable acoustical panels wrapped with fabric. All the large lecture halls had sloped or stepped down floors, which increased the difficulty of getting everything to the right height (plumbing, duct work, ceilings).
